PROFESSIONAL SUMMARY

Product Manager with 4+ years of experience building and scaling technology solutions across Fintech, SaaS, and Artificial Intelligence. Proven track record of taking products from concept to market by leading cross-functional teams of engineers, designers, and business stakeholders. Combines strategic product thinking with hands-on execution in user research, roadmap planning, data-driven prioritisation, and product launches. AI-native operator who uses autonomous AI agents to automate research, documentation, reporting, and analysis, which speeds up delivery and leaves more time for high-impact decisions. Passionate about building intelligent, user-centric products that solve real problems and deliver measurable business results.

SKILL & TOOL

Product Management: Product Strategy, Product Discovery, Roadmapping, PRDs & User Stories, Prioritisation (RICE, MoSCoW), Go-to-Market, Product Lifecycle Management

User & Market Research: User Interviews, Usability Testing, Competitive Analysis, Customer Journey Mapping, Jobs-to-be-Done

Data & Analytics: Product Metrics & KPIs, A/B Testing, Funnel & Cohort Analysis, SQL (basic), Mixpanel, Google Analytics, Amplitude

AI & Automation: AI Product Development, LLMs & Prompt Engineering, AI Agents & Workflow Automation, Claude, ChatGPT, Lovable.

Technical Literacy: APIs & Integrations, System Design Fundamentals, Agile/Scrum Delivery, Working with Engineering Teams

Domain Expertise: Fintech (Payments, KYC/KYB, Regulatory Compliance), B2B SaaS, AI Products

Tools: Jira, Confluence, Notion, Figma, Miro, Linear, Trello, Slack

Leadership: Cross-functional Team Leadership, Stakeholder Management, Sprint Planning, Mentorship

PROFESSIONAL EXPERIENCE

Spidra Mar 2026 – Present

Product Manager

- Drive product strategy and roadmap for Spidra, an AI-powered web data API that turns any website or document into structured JSON and Markdown for developers, AI builders and data teams.
- Led the launch of Spidra's MCP server, letting AI assistants such as Claude, Cursor and VS Code pull live web data directly, positioning Spidra as core infrastructure for AI agents.
- Built a library of 90+ ready-made templates for high-demand sources such as Google Maps, Amazon, LinkedIn and Indeed, cutting time-to-first-result for new users and driving a 40% increase in daily active users.
- Worked with engineering to improve extraction reliability through browser actions and CAPTCHA handling, raising success rates on complex, dynamic websites and reducing support tickets.

SkillHat August 2025 – Feb 2026

Product Manager - AI consultant Accelerator

- Led 0⟶1 development of [Product Name], an AI-powered automation platform that lets content creators schedule and publish posts to Instagram, TikTok, X, LinkedIn and Facebook at once from a single workflow.
- Owned the product roadmap from concept to launch, turning ambiguous creator needs into clear PRDs and a prioritised backlog, reducing scope creep by 35%.

- Rapidly prototyped the product with Lovable (AI app builder) and validated designs through hands-on testing with real creators, using their feedback and usage data to prioritise AI caption generation, optimal posting-time recommendations and cross-platform content repurposing.
- Prioritised features by user impact and business value with engineering and design, and streamlined the delivery workflow to improve efficiency by 18%.
- Ran a pilot with 10 content creators, achieving 80%+ user satisfaction and strong reported efficiency gains, and used their feedback to guide product iteration.

SCRIH Nov 2023 – Jul 2025

Product Manager, Platform | Remote

- Owned product vision and strategy for Worksync, a 0⟶1 internal workspace platform replacing Google Workspace, cutting company tooling costs by ~60% and taking the product to beta with partner companies as a potential B2B SaaS offering.
- Led a team of 5 engineers across five integrated modules (Meet, Drive, Calendar (RFC 5545), Notes, and Docs/Sheets/Slides via open-source OnlyOffice), owning roadmap, prioritisation and trade-off decisions from discovery to beta.
- Designed Worksync's AI features, including note summarisation and workflow automation built around the company's own processes, making AI a core part of the product instead of an add-on.
- Turned a short client brief into an end-to-end recruitment platform for the Nigerian Navy, processing 100,000+ applicants. Designed eligibility screening, region-based application caps and batch email automation, cutting application time to under 5 minutes and saving 600+ hours of manual work.
- Led a 4-person data team to deliver a real-time food price intelligence dashboard across African regions, defining the roadmap for multi-source ingestion (user surveys and web scraping) and near real-time aggregation that gave stakeholders timely visibility into regional market prices.
- Managed a portfolio of 6 client products across IT, security and e-commerce alongside two flagship internal products, owning scope, stakeholder alignment and delivery for each.

EARLIER EXPERIENCE

ANOLA*, Customer Support* Mar 2022 – Jun 2023

- Supported customers on an e-commerce platform, resolving issues across catalogue, cart and payment flows and maintaining a 74% satisfaction score.
- Authored Product Requirement Documents and decomposed complex initiatives into scoped engineering milestones for delivery teams.
- Worked with engineering to reproduce, document and prioritise customer-reported bugs, improving the quality of fixes.

EDUCATION

Olusegun Agagu University of Science and Technology, Okitipupa, Nigeria 2022

Bachelor of Science,, Microbiology

Second Class Upper
